

10th ANNIVERSARY FOR HOTEL & RESORT EXPERTS

May 2009 marks the tenth anniversary of the establishment of operations for Best Management Group.

Founding Director David Catterall said “it is especially satisfying to be vibrant and growing steadily even in these tough times for what is always a challenging industry. We have a great team of management experts that have each contributed to our continuing success, providing excellent career opportunities in the properties we manage.”

Best Management Group is based in Toowong Tower, Brisbane and operates a boutique range of properties in various Australian locations. The company is also involved in a number of new hotel and resort developments.

The company attributes its success to a flexible approach to servicing the needs of property owners. Best Management Group owner clients include public companies, developers, private investors and administrators. Hotel and resort owner clients have been with the firm for an average of over five years each.

“We are Brisbane based and most of our clients are from this region, however they often have investments further afield so our range of operations has extended into most states and even overseas” says David.

Best Management Group was recently appointed to operate the 301 room Treetops Resort & Spa in Port Douglas, North Queensland. It is now undergoing a major refurbishment. The company also operates the iconic Cumberland Lorne Resort in Victoria.

The last ten years have had many highlights for the organisation, including the establishment of The Point Brisbane a 103 room 4.5 star boutique hotel that has attracted a quality clientele, won numerous awards and commands a tariff premium.

Other highlights including the stunning turnaround of the 304 room Uni Resort in Brisbane, and the establishment of Domain Resorts on behalf of Consolidated Properties.

Best Management Group is well positioned for further growth, taking on management assignments with hotel and resort property assets. “We can quickly install specialist teams, armed to take control of existing operations, rationalise costs, install professional reporting and improve outcomes for hotel and resort property owners” said David.
