

REMEDIAL MANAGEMENT SERVICES FOR HOTELS & RESORTS

Best Management Group specialises in remedial management services in the hotel and resort segments, and offers expert teams to take operational control.

The company is Brisbane based and clients include receivers, administrators, institutions and private owners. Short term management arrangements can be put in place to facilitate a professional and orderly process of asset disposal.

Established in 1999, the firm has a strong track record in offering turnaround services for struggling resorts and hotels, and assisting with short term management services to facilitate asset sales.

Best Management Group knows where to focus, and what to do to revitalise the performance of hotels and resorts.

“On a typical assignment, we reorder the organisational structure, refine financial reporting, define appropriate operational strategies and realign staff focus” says David Catterall, Director. This ensures the Owner maximises short term cash flow and moves steadily to realising maximum value.

Best Management Group operates a range of properties and has a team of experts in operations, marketing, finance and administration. The firm has a comprehensive system of management tools tailored for the unique Australian environment, along with a highly professional management reporting suite.
